This document is a self - discovery tool used in career exploration. It is not a psychological assessment.If you have any questions contact International Assessment Network.

1. NARRATIVE INTERPRETATION

1.1. INTEREST IN JOB CONTENTS (Those tasks you want to perform)

The Interest section identifies the ideal job content for you by identifying your motivations and preferences, called Worker Traits. These traits are listed in order of priority. Typically, what one wants to do is that which he/she is most likely to do and do it often enough (including training for it) to transform the raw interest into real skills, and then, to stay on that job. The Interest section of your MAPP report outlines your preferences toward work in relation to people, creativity, social activities, routine, tools, equipment and more. The Interest section is the first glance of your top motivators. Each section thereafter will inter-relate and you will begin seeing themes about the types of tasks and work that you prefer.

joshua is conscious of existence, meaning, purpose, potential and destiny of humankind, people, and self. joshua is motivated by a self-felt, self-accepted calling to the cause of good, growth, and gain in the lives of others. Influential communication of ideas is a primary way of achieving those objectives. Perception and thinking tend to be holistic and conceptual; i.e., seeing the big picture. It is important to see which of the other traits are interactive with this trait because there can be many interesting combinations. This is a major trait in cultural, intellectual, academic, and creative activities. It includes ideas, concepts, theory, ethics, and values.

joshua prefers to associate with others socially, organizationally, and recreationally. In addition to assuring company with others, association is an important arena and environment for interacting with people in a variety of ways: leadership, managing, supervising, communicating, serving, caring, etc. Other traits have to be considered to determine how and why joshua is motivated to associate and interact with others.

joshua is motivated to manage people and their activities. Such management can be exercised with a variety of talents joshua may possess and for a variety of reasons. The primary reasons may be: 1) to exercise executive, managerial, or supervisory responsibility and authority, 2) to have the management position, role and recognition, 3) to not be in a subordinate, supervised position or role. Because emphasis is on the management of people, this is seen by joshua as a service role where the managing is in the interest of those being managed. Whether joshua is motivated and equipped to manage on a "take charge" or "given charge" basis (an important difference) can be determined by the motivational strength and involvement of other related traits.

Preferences for joshua fully support being perceptually, subconsciously, and consciously aware of fantasy, symbols, symbolic relationships, abstract ideas, options, and choice of options as they relate to creative or innovative activities. Perception triggers ideas in joshua's mind, a process that just happens - a process often called intuition. It is not a conscious effort to logically "come up with" creative ideas; instead, the process is best identified with the statement that "a thought struck me." A quote by Carl Jung probably makes complete sense to joshua: "Art is innate in the artist, like an instinct that seizes and makes a tool out of the human being. The thing in the final analysis that wills something in him is not he, the personal man, but the aim of the art."

joshua has natural preferences that engender curiosity about the nature of things and about "what makes things tick". In addition, motivational levels are highest where activities allow thinking focused on the inquisitive, exploratory, analytical, and experimental. "Technical" orientation is often the interaction of two or more of these traits: Scientific, Natural/Outdoor, Mechanical, and Managerial. It is important to identify the other traits involved to determine whether joshua is more technical, scientific or systems-oriented or if these traits are balanced.

joshua is motivated to work on projects that are planned, scheduled, and completed. This indicates a preference to complete a project rather than leave it unfinished. But completion or achievement may be offset by switching to a project of higher priority and/or interest, with the hope that the uncompleted project may be done another day. What is not completed will probably be kept in mind until it is completed.

Motivational levels are highest for joshua when in the limelight where recognition is earned, deserved, or given. However, there is no "ego trip" involved in the effort. joshua can comfortably function in the foreground or the background. Nonetheless, recognition is a motivating vocational factor.

joshua prefers and may even require change and variety. Sameness and routine cause loss of interest, drive, and energy. joshua probably sees a truth in the saying "a change is as good as a rest." This individual enjoys vocation, recreation, and/or vacations that include lots of change and variety, new challenges and experiences as well as new contacts and acquaintances.

joshua prefers to be with people and will most likely avoid activities that are done apart from others. joshua considers "one-among-others" togetherness as an essential environment for personal, work, and/or recreational activities.

joshua is motivated very little by physically working with things and objects as a primary or important part of work or recreation. Other activities carry a higher priority. Sensory/physical traits have probably not been developed well enough to be considered a motivational feature of work.

1.2. TEMPERAMENT FOR THE JOB (How you prefer to perform tasks)

This Temperament section identifies the motivation and talent an individual possesses in twelve Worker Trait Areas and coincides with the Interest section. The Temperament and Interest sections say the same thing from a different perspective. Your highest motivators will be displayed first. In this section you will learn things such as; do you prefer lots of change and variety on the job, are you persuasive, do you prefer to work in teams or independently, are you a naturally driven to evaluate and analyze, and more.

joshua prefers and needs change and variety. Change is motivating, stimulating, and energizing. joshua looks for new options, challenges, assignments, acquaintances, relationships, and even new careers in new places. joshua tires of sameness, repetition, and routine even in activities that were interesting at the start. Once things become routine for joshua, this becomes a motivation to move on to more interesting things.

joshua is most likely benevolent, voluntarily giving of self to help others, especially regarding current pain, hurts, stress, needs, and problems. This means empathetic, sympathetic, intentional, personal involvement in the personal lives of others to give help, sacrificially if necessary, and to subjectively gain personal satisfaction from providing personal service. (NOTE: emphasis is on the word "personal." This is a heart trait and is totally self-motivated and voluntary. It is one of the most strongly motivated traits in determining vocational dedication. The word "others" is important in the context of benevolence) joshua is probably more benevolent toward persons not intimately, formally, or organizationally related. (NOTE: Benevolence expects those in close relationships to join in the giving rather than being a priority recipient.) Nonetheless, joshua probably exhibits benevolence toward all persons. But benevolence does have priorities about eligibility of persons for help.

joshua is strongly motivated to be organizationally active with others. joshua senses and accepts a certain degree of self-assumed responsibility for the good, growth, and gain of others.

joshua subjectively exercises responsibility for social, vocational, or recreational perceptions, thinking, options, choices, decisions, and actions. This is an important, broad scoped, in-depth factor that includes social, leadership, management, and mental activities. Responsibilities which fit joshua's preferences are identified by many other traits. The purpose of this factor is to emphasize that joshua accepts, assumes, and acts responsibly (and probably assertively) relative to the exercise of talents and skills, and those talents and skills might apply to various forms of leadership. Perception, thinking, and action tend to be in the context of the "big picture". Thinking is holistic, conceptual, exploratory, and analytical.

(NOTE: "Evaluation: to appraise carefully; to judge as to worth or amount; to estimate generally.") Most likely, joshua has a logical mind which "makes sense" of what is perceived regarding the big picture and pieces of the picture within the context of that big picture. It is evaluation or assessment after perception, not the process of perception itself. Emphasis is on patterns, linkage, and relationships. Intuition may be involved in conjunction with this evaluation/assessment process.

Mind and mental activity are very central to joshua's vocational activities. (NOTE: "Intuition is very different from thought, from feeling and from sensation, by the major characteristic of insight. Intuition comes from the Latin meaning, literally, 'in to you'." Intuitive insight results from 'identification with,' rather than 'looking at' the object of attention. It is 'being a part of.' Intuiting is a

process, not of perception, but of experience. There is no need for interpretation in intuition. Intuitive relationship implies contact. So one does not perceive; one experiences." ~Quote from Robert Ashby) joshua has a preference or perhaps the talent or ability for experiencing abstract ideas, creativity, concepts, theory, assessment, and choice of options. New ideas and creativity must have an important place in vocation.

joshua prefers and actually seeks organizational management responsibility. Emphasis is on firm, take charge management to get things done through utilizing the talents and abilities of others. Skills are primary. joshua is not interested in the activity in order to socialize, empathize, sympathize, or manage on a psychological, personality, emotional, or ego basis. It is management with balance between the big picture and pieces of the picture. This management is fairly administered, as long as performance, quality, and results are the measuring criteria.

joshua is strongly motivated to: 1) have direct access to the listener, 2) intentionally, assertively (maybe aggressively), orally communicate to the listener, 3) cause the listener to hear and understand what is said, 4) cause the listener to willingly or otherwise accept what was said, and 5) cause the listener to act on what was said if that was the intent. Persuasion suggests confrontation of wills and may include intimidation, intentional or otherwise, overt or covert. It is important to look at other traits to identify the motivation, purpose, style and objective of this persuasive trait. joshua is going to persuade; the only questions are: when, how, and for what purpose.

joshua highly prefers a given, known, managed, and supported organizational position and role, in which and from which, to functionally serve the interests of the organization. This is an involved service role.

joshua does not prefer or need to be managed by others. It is important to study related Worker Traits to determine whether joshua is motivated to manage, influence, persuade, or work independently. Persons who don't wish to be managed sometimes do not perform or adjust well when closely monitored or supervised. They resent being dominated, managed, or controlled by others.

joshua does not generally see, retain, and/or recall verbatim detail and, instead, shows an awareness of concepts, patterns, general ideas, etc. joshua "Gets the drift" of what is seen, read, or heard. Recall is in general and in relative terms and not in specifics. Numbers are sometimes transposed. Words are read as form or pattern rather than by specific letters. Although this concept is built around ability, addressed here is how these abilities generally affect current preferences and specific motivations pertaining to the situation.

joshua does not prefer being tied to or tied down by timed, repetitious sensory/physical activity. Such work quickly becomes boring, frustrating, and stressful. In such work, joshua seeks and needs frequent breaks and other change and/or variety. Performance and quality of work tend to fade as repetitive activity continues.

1.3. APTITUDE FOR THE JOB (Expression of performing tasks)

This is a highly generalized section in which the narrative deliberately focuses on the combination of motivations and preferences as they relate to personal talents or skills. It lets the individual look into a vocational mirror and see his/her own talents and then decide for themselves where they fit and function the best with regard to motivation and preference. It is another context in which to see if priorities are mental, sensory, or physical: "To thine own self be true."

joshua's preferences and motivations are derived from understanding the deeper or 'real' meaning of ideas and words and uses them effectively in written or oral communication. Literary in this factor means intentional search for ideas expressed by the minds of others for one's own use, assimilation, learning, etc. The source can be books, other publications, historical documents, research information, drama, movies, television, the "information highway" or internet, etc. Emphasis is on communication: picking up information from minds of others or communication aimed toward the minds of others. Journalism and writing are major activities. Literary activity is not exclusively intellectual, academic, or cultural. It may be an end in itself as in a bookworm for instance. And literary activity is not always accompanied by communicative activity, written or oral. On the other hand, communicative activity need not be literary in the classic sense. And one need not be persuasive to be communicative, but it helps. When the trait is highly

motivated, as it is here, it suggests both literary and communicative abilities that are or could become a usable skill or a developed talent. By now you can see that only a review of all traits will clearly show the specific content of joshua's literary and/or communicative preferences and motivations.

joshua's preferences fully support holistic, conceptual perception, and thinking relative to the basic nature, utility, potential, or strategic possibility of what is being observed or considered. This includes intuition, insight, creativity, curiosity, experimentation, and innovation in various degrees. Ideas are at the heart of this talent. The basic orientation is perceptual and mental seeing.

Philosophical, cultural, scientific, literary, managerial, and/or computational work, more than likely, represent very important types of mental activities for joshua. Being capable in those activities, joshua's mind is naturally receptive to consider abstract ideas, theory, concepts, inquiry, exploration, analysis, logic, systems, and procedures. Factors in this aptitude section, plus the data and reasoning sections show the degree of motivation and talent joshua has for each of those mental activities. High rating for this trait indicates an intellectual orientation that is functional in, or has potential for, academic, scientific, research, literary, executive, or consulting activities.

Sensory/mental awareness of "pieces of the picture" is capacity for comparative, intra-holistic recognition of parts relative to other parts and/or the big picture. It includes ability to see essential detail and make visual/mental comparison and discrimination relative to relationships of objects. The definition says "pieces of the picture," so it recognizes the picture and its larger context, but this trait still emphasizes pieces and their status as pieces. joshua prefers to see the big picture by first putting all the 'pieces' together. Most likely joshua already sees pieces as pieces rather than the big picture first and then breaking it apart into all the various pieces.

joshua's preferences are effected but not dominated by such things as beauty, color, and spatial measure: size, shape, perspective, and dimension. If and how that artistic awareness is applied depends on the presence, motivation, and influence of related traits and to what extent talents and or abilities exist. (NOTE: art, photography, oil painting, sketching, abstract art, mechanical drawing, landscape architecture for golf courses, layout of newspaper ads, computer publishing are all examples of potentially appealing activities given certain skill sets). Depending on the extent to which talents and abilities may exist will determine certain motivational levels joshua will have and how these preferences will be used and applied.

Although joshua does not specifically prefer mathematics, motivation is not swayed one way or the other as there is an adequate awareness and ability utilizing mathematics. Other traits will indicate which kind of math that preference applies to: theoretical, statistical, analytical, computational, business, administrative, clerical, arithmetic, or posting. Wherever it works best, it is a vocational asset.

In activities where joshua's motivational levels are highest is where awareness of specific detail is most likely. Otherwise, preferences lean towards other considerations not necessarily oriented toward details. joshua probably knows the saying 'There is a place for everything . . .', but everything doesn't always (or very often) get to that assigned place. If involved too much or too long where a preference for detail is required, joshua can actually experience a certain, (what can only be considered a mental form of) claustrophobia that may have adverse effects on mental activity.

The motivations and preferences influencing joshua's mind tend to not be oriented toward placing importance or emphasis on sensory/physical activity. Instead of 'thinking' what to do physically, or how to do it, other activities have much higher priority and therefore, preferences and motivations tend to lean towards those alternative activities. It is unlikely that joshua has a high preference for sensory/physical activities.

More than likely, joshua does not have highly developed, consistently reliable sensory/physical motivations either learned or naturally. There is little motivation to physically perform better each time, to beat one's last score (as in a game), to be the best operator in the crew, to look forward and back at sensory/physical activity as challenging and fun. Instead, joshua prefers to consider the sensory/physical system (the body) as 'on call' and adequately able to perform as expected.

joshua is not motivated for what is called 'workbench' activity where a person manually (primarily arms, hands, fingers) processes materials. There can be many reasons for disinterest in that activity: 1) joshua is motivated to do other things, 2) joshua does not naturally have the talent for sensory/physical activity of that kind, 3) the activity is too monotonous for joshua's activity preferences, or 4) it is too non-social where social activities are preferred. It is important to identify the reason(s) so joshua can function where natural talent or already existing skills and abilities as well as motivation are greater.

joshua has clear preferences that do not include handling minute manipulation of detail for extended periods of time. If asked, splicing telephone wires at a switchboard installation or knitting a sweater to enter in a county fair competition, joshua would likely indicate that these are not a preferred career or avocation.

1.4. PEOPLE (How you relate to people, in priority order)

In this section, seven people factors cover important activities related to the interaction of a person with other persons. These are very important for individuals motivated and perhaps even naturally talented or specifically trained for associating and interacting with people. They may also be important traits for certain "people intensive" jobs. Low motivational ratings in this section may also be quite positive and valuable, if occupations necessitate or require that an individual function apart from others, manage his/her own activities, or be satisfied with work in isolation.

"Mentor: a trusted counselor or guide." joshua is interested in and consciously prefers to consider the existence, meaning, purpose, potential, and destiny of mankind, people, persons, and self; with self-felt, self-accepted responsibility to influence and/or cause good, growth, and gain in the lives of all concerned. joshua has intuition and philosophical curiosity that causes an awareness of personality, intentions, emotions, ethics, values, and moods of other persons, and of self. By itself, this is not benevolence. If joshua is highly motivated for benevolent activities, this trait is compulsively central to personal and vocational activities. If there is a lack of personal motivation, then the preference for consideration tends to be more philosophical or academic in nature, but still service oriented.

Philosophical, literary, scientific, managerial and/or persuasive traits may be involved in joshua's motivation and drive to educate, train, or influence others. The main preference is to share knowledge and information that will be useful. So, conveying information to others assumes that educating self precedes educating others. joshua is motivated by learning, seeing the big picture, recognizing how pieces fit the picture, and prefers passing information on to others. Because so many traits might be involved in instructing activities, it is important to scan the other traits to see which traits are important.

joshua's personal motivations support the willing acceptance of responsibility for planning, assigning, and supervising work activities of others in operational or administrative activities. Preferences focus on daily scheduling, procedures, expediting, motivating, solving problems as they arise, and meeting functional objectives. This sort of preference considers the prime responsibility as developing the will to work with employees and motivating them to higher levels of attainment and performance.

joshua feels both privilege and responsibility to use communication (including persuasion) to voluntarily provide beneficial information to others. This includes strongly motivated benevolent and literary traits. Self-satisfaction comes almost exclusively from the subjective realization that the information, voluntarily given, has been helpful to other persons. joshua is further motivated to learn and understand the other person(s) needs wishes and listening preferences. Non-persuasive service communication can become persuasive and persistent when expressed in the interest of someone needing joshua to stand up for them.

Highly motivated persuasion means that joshua intends to assertively, even aggressively, make direct personal contact with others, orally project a message with the deliberate intent and attempt to cause the listener or listeners to hear what is said, accept what is said, and act on what was said, so that joshua can close the deal. If it is for commission (i.e., in the seller's interest), it will be a hard-sell even though it might come across as a soft-sell. If it has philosophical or benevolent objectives, it will be a soft-sell. But if joshua is defending and/or championing the cause of the underdog or the less fortunate, then it will seem as if some modern-day Don Quixote and/or Joan of Arc are doing the persuading. (Note: As a single trait, persuasion is the most deliberately assertive, often aggressive, psychological expression/effort of an individual.)

This high drive to negotiate is intellectual more than psychological, assertive more than aggressive, logical more than emotional, strategically winning the contest more than persuasively winning a skirmish. joshua is strongly motivated to represent one position in a confrontation of different views and objectives and is motivated and determined to apply logic, strategies, and communicative skills to cause agreement, compromise, concession, or submission by opposing positions or views. Persuasion is probably involved; at least it is an asset, but it is not essential. Intimidation may be involved, but it is considered a poor tool for achieving objectives. Strategic thinking is preferred as the key element and is also represented in the reasoning section (Factor 1).

joshua's motivations are heightened significantly by persuasive, gregarious, auditory-musical, visual-artistic, and communicative traits to entertain others with intent to convince them toward a particular idea, viewpoint, direction, objective, or product. In this motivational context, entertainment is more than pleasing people. It has promotional and marketing objectives. Some preferred activities include: marketing, sales, public relations, television commercials, lobbying, political campaigns, promotional consulting, sports announcing, etc. Motivations may also be driven at the prospect of efforts to get ahead in various areas of entertainment and/or acting, i.e., to advance one's own career. Persuasion is the primary preferred trait. A high level of motivation exists because there is an element of risk involved where the effort has a goal tied to the end of the act.

joshua is compulsively motivated to personally help others, to voluntarily, perhaps even sacrificially, give of self in the others interest. On a single trait basis, this trait subjectively imposes more vocational calling, responsibility, and duty on the individual than any other trait. It is compounded if accompanied where philosophical traits have very high motivational levels. It is further equipped for vocational ability by motivated managerial, gregarious, persuasive, scientific, clerical, and/or routine traits. It becomes more sensitive, intuitive, empathetic, and sympathetic if accompanied by need for, and dedication to, harmonious, and compatible relations with others. Therefore, it is evident that many other traits can be involved. Review of all traits will show which traits are involved in joshua's social service. Medical practice, nursing, psychiatry, psychology, counseling, guidance, ministry, social work, volunteer social service, search and rescue, public defender activity in law are specific areas where joshua would find vocational expression and satisfaction.

1.5. THINGS (How you relate to things, in priority order)

Working with things, manipulation of materials and processes, and cognizance of operational and mechanical forces or objects, highlights this Worker Trait Code section. None of the factors in this section are directly related to people nor call for exclusive talents whether or not they exist within the individual. However, these factors do call for the interaction and interplay between mental, sensory, physical, and mechanical skills and/or abilities as possessed by the individual. If the individual has a natural mechanical savvy, and likes to work with his/her hands, this becomes a highly important and relevant Worker Trait Code section.

joshua has natural preferences related to mechanical, technical, or systems engineering. It includes natural mechanical savvy about "what makes things tick" and motivation to design, assemble, build, install, or operate machines, equipment, or systems. Engineering may or may not be the major vocational activity.

joshua is most likely not motivated to engage in activities requiring close, constant attention to precise standards, exact measurements, close tolerances, detection of minor defects, and long concentration on the process. Instead, there is a demonstrated preference for change, variety, and activities with less concentration and specialized focus.

"Being stuck to a machine all day" is not joshua's definition for a satisfying vocation, occupation, or job. There is little preference for understanding machines, little preference for steadily monitoring machine performance, and little motivation for coping with the routine that is required.

For one or more of a variety of possible reasons, joshua does not prefer working with heavy equipment operation.

joshua's preferences and motivations in vocational activity are not oriented toward routine, alert monitoring, recording, and reporting of operational or machine processes. Such activity is too clerical for joshua's preferences.

Manual labor is not an activity where joshua is in any way motivated. Routine, elementary, sensory/physical activity is not preferred; instead, it probably is experienced as boring, frustrating, and stressful.

joshua is not motivated toward processing activities, no matter what is being processed or who is doing the processing. There is no natural preference for this sort of activity.

joshua's motivations are not compatible with assembly line activity where one is locked into operational processes by station, function, and timing. Such activity would most likely be boring, tiring, frustrating, and stressful for joshua in a short time.

1.6. DATA (How you relate to data, in priority order)

The data section identifies preferences, motivations and priorities for certain kinds of mental activities. If interests and preferences are primarily intellectual, academic, scholarly, scientific, mathematical, or professional, this may be the most important section of the Worker Trait Code System for the person appraised. If his/her preferences are not primarily mental, this section may have little value. If these factors are important for this profile, then factors in the reasoning, math, and language sections will also be both relevant and important.

"Synthesize: putting two or more things together to form a whole; the combination of separate elements of thought into a whole; the operation by which divided parts are united" (Webster). joshua is motivated by seeing the big picture so much so that (s)he, attempts to see all parts of the picture in that larger context, then sees all parts relative to each other, but still within that larger context. Perception and thinking are therefore holistic and conceptual. Philosophical and intuitive processes are involved. Scientific, managerial, and/or literary preferences may also be involved. Other mental factors in this section are subordinate, secondary, or complementary to this primary motivational attribute. This is an overview and scanning activity that includes ideas, concepts, theory, fiction, hypothesis and assessment. (Note that words in the last sentence are unrelated to logic that Webster defines as "the science of the operations of the understanding subservient to the estimation of evidence.") For joshua, preferences for this sort of synthesis will allow it to get no further toward logic than estimating.

joshua is strongly motivated to coordinate: to take actions, to manipulate that which is at hand in order to "get the show on the road." Because of the strong motivational levels for this, it is very important to determine whether joshua has first seen the big picture, pulled in important pieces of the picture, made plans, and developed strategies before taking action. If "Coordination" is the top priority, it becomes a "General Patton Syndrome" which is to begin the charge, then identify the objective, and hope that someone follows with the supplies. If there are equal motivational levels in this trait as in other mental traits, it still means enthusiasm and drive to take action, but it is balanced with other related functions. This trait represents preferences that are goal oriented!

Preferences that direct mental activity for joshua are naturally curious, inquisitive, investigative, exploratory, analytical, and experimental. Words such as "if" and "why" are central to this trait. It is a factor that fits exactly between synthesizing and comparing, with emphasis on synthesizing. Analysis is more than seeing the big picture, or seeing how the pieces fit the big picture. The motivation to engage an activity or process comes from nonlinear speculating about new forms, possibilities, relations, and fits. In other words, it tends to be an executive function dedicated to possibilities.

joshua is highly motivated when given the task of identifying factors that are important for vocational use. This trait, comparing includes: 1) awareness of the context (big picture) in which the factor or factors would or could fit; 2) relationship of the factors to other factors within that larger context; 3) new possibilities of linkage or relationships of factors to the big picture; and/or 4) new possibilities of linkage or relationships of factors with factors in a new context. (NOTE: This is an important trait for research, technical activities, systems engineering, operations management, and administrative activity). Many trait combinations can be involved in this activity: scientific, literary, tangible problem solving, visual-artistic, philosophical, and managerial. It is important to identify which of those traits are involved in joshua's perceptual/mental preferences.

Compiling means more than simply gathering large volumes of data sheets and stuffing them in a filing cabinet. It means that joshua is motivated to find, identify, classify, store, remember, and retrieve what is important or what might be important for future use.

(NOTE: This is crucial for researchers, technical writers, lawyers, academic teachers, consultants, systems engineers, and programmers). This trait indicates a subconscious preference we could refer to as a "packrat" orientation, i.e., if it glitters; stuff it in the nest along with everything else because it might be useful sometime. Other traits will indicate how motivated the individual is to be thorough, practical, and efficient within this trait.

joshua is motivated to a degree for handling and solving routine, factual, mathematical problems. This set of preferences holds value in operational, technical, processing, or administrative activities. (NOTE: When interacting with other traits, as it does here, this trait has vocational value in many areas).

joshua does not prefer mailroom activities; i.e., duplicating and processing forms, bulletins, envelopes, etc. Detail and routine are most likely avoided as are activities related to them.

1.7. REASONING (How you relate to reasoning, in priority order)

This Reasoning section is closely linked with the Data section. The Data section identifies an individual's priorities or preferences (high and low) for ways of thinking, while the Reasoning section focuses on where, why, and how this thinking will most likely be applied. Just like the linkage between the Interest and Temperament sections, Data and Reasoning are coupled very tightly as well.

joshua is strongly motivated to apply thinking to the big picture through holistic ideas, concepts, options, and strategies. This does not mean, suggest, or imply that thinking is kept only in a holistic context but it does mean that the first and constant priority or preference for consideration and focus are on the big picture. (Example: joshua more likely prefers to be an executive rather than a manager, and more inclined to be a manager rather than a supervisor.) Considering how pieces of the picture are brought in to the big picture stimulates motivation for the activity.

joshua applies scientific/technical/logical thinking (to the fullest extent this ability exists) to identify, analyze, and solve challenges and/or problems; to collect data, establish facts, connect abstract and concrete variables, draw valid conclusions, determine appropriate action, devise strategies and systems to achieve objectives. (NOTE: This is engineering in the industrial and technical sense). joshua probably relates to the following quote as it illustrates this trait: "What marks the mind of the strategist is an intellectual elasticity or flexibility that enables him to come up with realistic responses to changing conditions...In strategic thinking, one first seeks a clear understanding of the particular character of each element of a situation and then makes the fullest possible use of human brainpower to restructure the elements in the most advantageous way." (Keniche Ohmae, The Mind of the Strategist)

joshua is motivated and perhaps even mentally equipped for troubleshooting: to recognize or otherwise identify problems or developing problems in familiar operational or procedural areas; to tackle problems with intent to solve the problems and restore function to former levels or better. (NOTE: This requires onsite familiarity with those operations, a sense or suspicion of where things might or could break down, and savvy about ways to fix the problem).

joshua literally may get 'system claustrophobia' if he/she has prolonged involvement in running, monitoring, or maintaining systems. The experience will most likely be regarded as boring, frustrating, and quite stressful. It could eventually lead to the proverbial question of which will have the first breakdown the system or joshua. This of course indicates no motivation or natural preference with regard to systems.

Methodical, meticulous, routine activities do not motivate, are not acceptable, or tolerable for joshua. Change, variety, options, challenge, and opportunity to move up based on merit represent more preferred activities.

joshua is not motivated to participate where simple, routine, basic tasks are primary.

1.8. MATHEMATICAL CAPACITY (How you relate to the applied usage of math)

Math is a natural talent like art or music and requires a certain natural preference. In most instances, you have it or you don't; you like it or you don't. If the individual has talent for math, this section shows where the greatest vocational interest and motivation

occurs, and that is where he/she has probably developed the most talent or could. Low ratings for some or all of these factors imply that math, or possibly that specific application of math, is not a motivational factor to this individual.

(NOTE: Accounting Control of Numbers is "management math" because management uses it for tracking, analyzing, and verifying business activities and performance). joshua prefers management math because it includes a specialization for managing with math, i.e., making management decisions with knowledge gained from this level of mathematical activity. This includes budgets, operation-based forecasts, competitive risk analysis, etc. (NOTE: Chief Financial Officers, Comptrollers, bank officers, CPAs, and auditors rate high in this trait).

Statistical, investigative use of mathematics plays a major role in what motivates joshua. This kind of math is valuable for many kinds of engineering activities: mechanical, systems, hydraulic, geological, computer, etc. Methodical, logical, pragmatic, and objectivism are central to the activity. Computers are typically essential for this work. The above examples of activities and descriptions most likely represent an ideal environment.

joshua is motivated to work with a wide variety of theoretical math concepts; make original application of those concepts; apply knowledge of advanced mathematical or statistical techniques to new areas of challenge, interest, or opportunity. Motivation is derived from conceptual, analytical, curious, and exploratory thinking. Research and theoretical logic probably appeal greatly to joshua's mind.

joshua has a moderate motivation where business math related to commercial calculations and transactions are called for. This means there exists a natural ability to be competent and accurate with addition, subtraction, multiplication and division. (NOTE: Where the ability does not already naturally exist for joshua, in this instance, motivational levels support training, most likely).

joshua does not prefer activities requiring verbatim perception, recording, and/or processing of details, especially where numbers are involved.

joshua may simply lack interest or the motivation to express self vocationally through the use of basic math skills while possibly quite capable. This is most likely demonstrated by consistent inaccuracy when making basic arithmetic calculations.

1.9. LANGUAGE CAPACITY (How you relate to the usage of language)

Four language traits are included in the narrative to cover basic activities that utilize words. They aren't very specific, but there are related factors for literary, journalistic, and communicative activities in the Interest, Temperament, Data, People, Aptitude and Reasoning sections. If a high motivational and/or preference level exists for one or more factors in this section, scan those other sections to discover preferences the individual has for those activities. Not all jobs call for orators or authors, while some jobs require such skills.

joshua is highly motivated to consider creative writing and communicating at professional levels. Preferences are holistic, conceptual, imaginative, and creative. "Ideas trigger more ideas" can probably be said about joshua. High motivational levels for this worker trait indicate an interactive combination of literary and philosophical traits. As Dean W. R. Inge said, "Literature flourishes best when it is half a trade and half an art." That probably makes a great deal of sense to joshua. Motivation at this level indicate preferences that probably include writing fiction, poetry, scripts for movies or television, advertising copy, marketing copy, teaching creative writing, etc.

joshua is motivated to describe, explain, teach, illustrate, and interpret. This is a journalistic trait dedicated to inform people. Social, leadership, influential, technical, service, and functional traits are involved as well. Therefore, it is necessary to review all worker traits to more closely identify joshua's preferences relative to this trait.

joshua does not pay particularly close attention to non-motivational information, data, or detail such as elementary and basic instructions. The natural preference may be to simply use common sense or to experiment in order to figure it out.

For Joshua technical information management is not a motivational factor. There is seemingly too much detail, routine, and paper work to maintain interest beyond a brief period of time.

2. WORKER TRAIT CODE SYSTEM

The Worker Trait Code System has been in use for over 30 years and has proven to be an outstanding vocational tool for identifying jobs, classifying job requirements, and understanding human motivation. The Worker Trait Code System has been modified from a proposal by the US Department of Labor's 1965 version of the Dictionary of Occupational Titles. The Worker Trait Code has seventy-two factors sorted into nine categories. The code's purpose is to identify "those abilities, personal traits, and individual characteristics required of a worker in order to achieve successful job performance." The architect of MAPP used this same criteria to define job positions and provide a method for individuals to identify their motivations and to improve their odds at success in "worker trait" terms. The Worker Trait Codes of the Position Profile and the Personal Profile can be simply and electronically matched in order to ensure the right person is working in the right job. The Worker Trait Code Report contains the percentiles which determine the level of motivation the trait has for the person. The higher the percentile or the lower the level number, the greater chance the person has to succeed or compete with the general population in the trait area or activity. For example, a score of 88% (Level 1) indicates that only 12% of the general population is more motivated and interested in vocationally expressing this task. Traits in Level 1 are compulsive; Level 2 is highly motivated; Level 3 is moderately motivated.

WORKER TRAIT SCORES

2.1. INTEREST IN JOB CONTENT

IN_2 - Direct business contact and interaction with others	1	78
IN_6 - Concerned with people, communication of ideas	1	78
IN_4 - Management of social or organizational activities	1	76
IN_8 - Abstract, innovative, creative activities	1	70
IN_7 - Technical, scientific interests and skills	2	57
IN_0 - Output drive: production, goals, efficiency	3	56
IN_5 - Work for personal gain, recognition, status	3	55
IN_3 - Routine, organized, methodical procedures	5	29
IN_9 - Nonsocial procedures, operations or functions	5	27
IN_1 - Physical work with materials, tools, equipment	5	22

2.2. TEMPERAMENT FOR THE JOB

TE_1 - Change and variety: accept, utilize, cause change	1	84
TE_X - Provide service dedicated to interest of others	1	83
TE_5 - Organizational involvement, teamwork, roles	1	77
TE_8 - Handle responsibilities, choices, decisions	1	76
TE_0 - Evaluation: logical study, analysis	2	69
TE_9 - Intuition, creativity: ideas, concepts, options	2	65
TE_4 - Plan, control, direct activities of others	2	61
TE_7 - Aggressively influence, persuade, get agreement	2	57
TE_6 - Independent, self-planned, self-performed activity	4	36
TE_3 - Work under management or supervision by others	4	32
TE_Y - Work with detail, data, records, inventory	5	25
TE_2 - Routine activity set by schedule or operations	5	22

2.3. APTITUDE FOR THE JOB

AP_V - Literary and/or Communicative orientation	1	81
AP_S - Mental/Sensory awareness of "the big picture"	1	73
AP_G - Intellectual and/or Analytical orientation	2	69
AP_P - Sensory/Mental awareness of "pieces of the picture"	2	62
AP_C - See and sense colors, shades, patterns, textures	3	45
AP_N - Computational or analytical use of numbers	4	37
AP_Q - Sensory/Mental awareness of detail per se	4	32
AP_K - Mental/Sensory coordination of physical action	4	30
AP_E - Simultaneous skills in complex physical tasks	5	29
AP_F - Mental/Sensory skills in handling fine detail	5	21
AP_M - Manual dexterity in routine "workbench" activities	5	21

2.4. PEOPLE

PE_0 - Mentor: size up people, personalities, motives	1	80
PE_2 - Instruct: teach, train, influence, demonstrate	1	79
PE_3 - Supervise: plan, manage work activity of others	1	77
PE_6 - Service communication: voluntarily inform others	1	74
PE_5 - Persuade: assertively influence, convince others	1	73
PE_1 - Negotiate: confront, communicate to achieve goal	2	65
PE_4 - Entertain: to deliberately influence others	2	64
PE_7 - Social service directly benefiting others	2	60

2.5. THINGS

TH_0 - Engineering, technical planning, installation	4	39
TH_1 - Precision/quality: technical, mechanical standards	4	30
TH_2 - Operate/control: on-site machine operation	5	25
TH_3 - Drive/Operate: mobile and heavy equipment; controls	5	24
TH_5 - Tending: monitoring/adjusting gauges, switches, controls	5	23
TH_4 - Manipulate: physically manage material processes	5	22
TH_7 - Handling: basic, routine manual labor	5	22
TH_6 - Feeding/offbearing: manual labor timed by machines	5	20

2.6. DATA

DA_0 - Synthesize: holistic, conceptual, strategic thinking	1	76
DA_1 - Coordinate: plan, implement, manage procedures	1	73
DA_2 - Analyze: investigate, research, experiment	1	71
DA_6 - Compare: recognize important factors for use	2	59
DA_3 - Compile: gather, classify, store information	2	58
DA_4 - Compute: solve routine mathematical problems	4	43
DA_5 - Copy: duplicate, transcribe, record, send	5	29

2.7. REASONING

RE_6 - Holistic concepts, meanings, options, strategies	1	81
RE_5 - Apply ideas and strategies to real problems/tasks	1	74
RE_4 - Solving on-going problems in familiar areas	3	51
RE_3 - Operational systems, procedures, maintenance	4	35
RE_2 - Methodical and thorough in routine procedures	4	33
RE_1 - Follow specific directions for basic, routine tasks	4	30

2.8. MATHEMATICAL CAPACITY

MA_4 - Analytical, accounting, auditing use of math	1	72
MA_5 - Statistical, investigative mathematics	2	66
MA_6 - Research: innovative, experimental use of math	2	65
MA_3 - Computational: solving routine math problems	4	43
MA_2 - Elemental: add, subtract, multiply, divide	5	22
MA_1 - Counting/Posting: inventory, data processing	5	22

2.9. LANGUAGE CAPACITY

LA_6 - Creative literary, communicative ability	1	80
LA_4 - Systematic, logical explanation and education	1	75
LA_2 - Record, transmit, post, file information	5	24
LA_1 - Read, understand, follow basic instructions	5	24

3. VOCATIONAL ANALYSIS

The Vocational Analysis provides nineteen major vocation areas for consideration, based on major vocational categories suggested by the US Department of Labor in sorting its Dictionary of Occupational Titles. These areas are ranked from highest to lowest potential. The ranking is obtained by comparing the individual's score to the general population. Each major vocational area further contains specific occupational titles which are also ranked to identify occupational potential. You may see an occupational title with a high rating while the vocational heading has a low rating, or vice versa. Strong vocational and occupational ratings in the same group indicate the greatest potential for success. However, each occupational statement should be reviewed individually.

3.1. MAJOR VOCATIONAL AREAS

Counseling, Guidance	1	82
Business Relations	1	79
Law and Enforcement	1	77
Entertainment, Promotion	1	75
Education and Training	1	75
Medicine and Health	1	73
Merchandising: Selling, Demonstrating	1	72
Investigating, Testing	1	70
Writing and Journalism	2	57
Fine Arts: art, music, drama	2	57
Personal Services	3	52
Mathematics and Science	3	46
Engineering	3	44
Farming, Fishing, Forestry	5	29
Machine Work	5	25
Clerical	5	24
Transportation: Trucks, Bus, Taxi, etc.	5	19
Crafts	5	15
Elemental Work	5	11

3.2. FINE ARTS

Decorating and Art Work: design, arrange, consult	1	80
Instructive, Fine Arts: drama, art, music	2	63
Art Work: creative expression, ideas; paint, draw	4	42
Photography: aesthetics, form, color, perspective	4	41
Artistic Restoration: detail, precision; restore	5	14

3.3. BUSINESS RELATIONS

Interview/Inform: gather, dispense information	1	78
Consulting, Business Services: evaluate, influence	1	77
Business Training: teach, demonstrate, communicate	1	75
Contract Negotiations: confront, persuade, close	1	72
Corresponding: prepare, edit, send communications	2	68
Corporate Leadership: executive, managerial	2	68
Accounting, Auditing: analyze, compare, report	2	60
Supervisory: responsible for work done by others	3	52
Information Processing: gather, verify, send, file	3	50
Title and Contracts: find, examine, confirm	3	49
Managerial: organize, coordinate departmental work	3	48
Managerial/Supervisory - Service: coordinate	5	26

3.4. CLERICAL

Secretarial: clerical; minor executive assignments	2	62
Switchboard Service: relay incoming office calls	4	32
Facilities Services: utilize equipment and people	4	32
Schedule, Dispatch, Expedite: coordinate activities	4	32
Sort, Inspect, Measure: quality, tolerance, value	5	28
Computing and Related Recording: numerical problems	5	25
Inspecting, Stock Checking: inventory, verify, store	5	25
Paying, Receiving: cash transactions (tellers)	5	23
Classify, File: clerical detail, forms, filing	5	22
Typing, Related Recording: routine data processing	5	21
Typesetting, Reproducing with Machines: detail, form	5	20
Stenographic: shorthand, typing, word processing	5	19
Routine Checking and Recording: processing totals	5	17
Cashiering: receive money for goods or services	5	17

3.5. COUNSELING, GUIDANCE, SOCIAL WORK

Research, Social Science, Psychological	1	77
Guidance, Counseling: personal, work, school, spiritual	1	72

3.6. CRAFTS (Skilled Trades)

Craft Management: plan, oversee craft activities	1	78
Trade Supervision: direct onsite craft activities of others	4	39
Costuming, Tailoring, Dressmaking: artistic textile crafts	5	25
Precision Working: rigid standards, tolerances	5	25
Cooking and Related: plan, prepare, serve foods; timing	5	21
Manipulating: sensory/physical/mechanical work	5	21
Craftsmanship: build, process, repair, inspect	5	20

3.7. EDUCATION AND TRAINING

Training Services: human resource development	1	83
High School, College, University; teach/counsel	1	80
Supervisory and instructive: teach/manage service classes	1	79
Kindergarten, Elementary Education: teach, nurture	1	75
Vocational Education: teach/demonstrate; apprentice	2	66
Instructive: hobbies, crafts, games, recreation	2	63
Physical Education: sports; coach, develop skills	2	61
Industrial Training: systems, processes, machines	3	47
Animal Training: obedience, performance, show	4	39
Flight and Related: teach aircraft flight/operation	4	31

3.8. ELEMENTAL WORK

Feeding/Offbearing: manual labor, machine-timed	5	23
Handling: routine nonmachine tasks, basic work	5	21
Signaling: alert observation; guide/warn public	5	13

3.9. ENGINEERING

Human Engineering: identify, develop/apply human skills	1	80
Sales Engineering regarding Technical Markets and Customers	1	79
Engineering, Scientific, Technical Coordination	1	74
Technical Writing: logic, terminology, explanation	2	66
Industrial Engineering: plan, direct, install, erect	3	52
Systems Engineering: research, design, develop, apply	4	41
Engineering Research and Design: conceive, experiment	4	39
Surveying, Prospecting: explore, locate, map	4	33
Drafting and Related: graphic layout/diagrams/detail	5	21

3.10. ENTERTAINMENT

Musical, Creative: compose, arrange, improvise	2	67
Creative Entertainment: imagination; spontaneous	2	65
Dramatics: interpret, portray roles	2	60
Modeling: artistic display; fashions, apparel	3	56
Radio, TV Announcing: poise, vocabulary, delivery	3	55
Musical, Instrumental: professional potential	3	54
Specialty Entertainment: please others to make sales	3	52
Musical, Vocal: singing, choral, solo; public	3	51
Recreation/Amusement: challenge, risk; competitive	3	44
Rhythmics: dancing, ballet; precision of movement	4	32
Amusement/Entertainment: physical, gymnastics, sports	5	28

3.11. FARMING, FISHING, FORESTRY - OUTDOOR, REMOTE

Technical/Scientific Support: lab/field service	4	34
Farming, Fishing, Forestry: outdoor craftsmanship	5	20

3.12. INVESTIGATE, INSPECT, TEST - LAB/FIELD SERVICE

Investigate/Protect: monitor, enforce regarding regulations	2	59
Appraise/Investigate: assess, evaluate, measure	4	31
Material Analysis/Physical Science: test regarding specs	5	29
Transport, Test Drive: operator, pilot, engineer	5	17

3.13. LAW AND ENFORCEMENT

Legal and Related: practice of law; judges, lawyers	1	74
Protecting: Monitor, defend persons and property	3	52

3.14. MACHINE WORK

Setup, All around Machine Work: install, technical	4	30
Driving/Operating: heavy equipment control and operation	5	22
Operating/Controlling: stationary machine operation	5	22
Setup/Adjust: tuning machines to performance standards	5	19
Tending: observing operations, instruments, gauges	5	14

3.15. MATH AND SCIENCE

Health Physics: safety engineering, occupational	1	83
Scientific Research: probe, analyze, experiment	3	48
Math regarding Physical Sciences: collect, analyze data	5	24

3.16. MEDICINE AND HEALTH

Nursing, X-Ray; technical care for patients	2	58
Child and Adult Care: health maintenance, support	3	54
Medical, Veterinary: diagnose, treat, prescribe	3	50
Therapeutic: rehabilitation, physical or mental	3	48
Surgery: manual/instrumental operation/correction	4	42

3.17. MERCHANDISING

Promotion/Publicity: advertise, market, promote	1	75
Demonstration sales: store contact with customers	2	67
Purchase and Sales: merchandising; stores, markets	3	54
Sell in Seller's Interest: gain for self; commissions	4	42
Sales and Service: selling, installing equipment	4	40
Delivery Services: mail, products, services	5	23

3.18. PERSONAL SERVICE

Customer Services: clerical, duplicating, sending	2	69
Volunteer Social Service: social, personal	4	39
Courrier Service: escort, assist, deliver	4	31
Beautician/Barber (Stylist): cosmetic services, styling	5	25
Personal Service: valet, butler, maid, food service	5	23
Customer Service: craft, repair, improvements	5	20

3.19. TRANSPORTATION, PUBLIC

Driver, Public Transportation: bus, taxi, limousine	5	26
---	---	----

3.20. WRITING

Journalism and Editorial: write, edit, publish news	1	77
News Reporting: gather, write, send information	1	72
Creative Writing: author; imagination, vocabulary	1	72
Translating/Editing: language, format, composition	5	29

4. PERSONAL ANALYSIS

The Personal Analysis indicates the basis for every rating, percentage, code, and narrative paragraph produced by MAPP. This report is directly based on the responses of an individual to the 71-triad, forced-choice preference survey. The source information comes from the person's indicated preferences in the assessment - and nowhere else. Therefore, the appraisal only reports what the individual was saying about "self" through those responses to the most/least choices. Responses create a record of the level of motivation for each of twenty-three traits (see section 3.2). By complex "construct" analysis, the computer identifies what happens as the result of the combined motivational interaction of all of those twenty-three traits. This complex interaction of all traits produces the rating and percentage for each of the factors in MAPP. Please keep in mind how many different trait combinations can produce the same ratings for a factor in MAPP. Every number presented in MAPP output is the result of these complex trait interactions, and it is statistically unlikely that any two individual's appraisals would ever be the same!

4.1. TRAITS OF THE PERSON

The source of all data interpolation/extrapolation in MAPP, these twenty-three core "traits", identify a unique quantification and qualification for each individual. Because of the interplay and inter-dependency between these traits and their values, the possible combinations are almost beyond human comprehension. It is greater than the total number of people who ever lived on this earth. The actual expression would be seventeen to the one hundredth power interacting with seventeen to the eleventh power. It is suggested that serious study be applied to this list in order to get some idea of what happens when your individual traits simultaneously attempt to influence thoughts and actions. Sometimes traits are complementary and, therefore, strengthen, reinforce, and encourage other traits. Sometimes traits are totally contrary and antagonistic to each other. This may result in one trait trying to prevent expression and satisfaction of another. If only one can be expressed, the other may cause stress.

Change and Variety	1	85
Philosophical	1	82
Gregarious	1	81
Management, Strategic, Risk	1	80
Cultural (Romantic)	1	78
Management, Organizational	1	76
Literary, Communicative	1	73
Benevolent	1	73
Scientific	2	67
Persuasive	2	63
Harmonious, Compatible Relations	3	53
Management, Operational	3	48
Technical (Classic)	4	41
Auditory/Musical	4	34
Computational, Numerical	4	31
Visual/Artistic	4	30
Firm Opinions and Positions	4	30
Mechanical	5	29
Detail, Clerical	5	22
Self-oriented	5	21
Attachment to the Familiar	5	20
Nongregarious	5	18
Natural/Outdoor	5	15

5. PERSONAL ORIENTATION

This section can be used as a stand alone sub-system. It provides a good summary of everything else found in MAPP and, therefore, it is deliberately redundant. You will see things in the Personal Orientation" section that relate to, or even repeat, what is in other sections.

5.1. LEADERSHIP FACTORS

Executive leadership, strategy, influence	1	89
Management: administrative, operational	1	77
Social, fraternal, organizational leadership	1	76
Supervision of operational processes and people	3	49
Expediting, scheduling, dispatching	4	41

5.2. INTERPERSONAL FACTORS

Other-oriented: involvement, sharing, caring	1	83
Tactful concern for feelings of others	1	77
Aggressive personal action; confrontation	1	73
Persuasive motivation to influence others	1	72
Take charge leadership and influence; dominance	2	63
Avoid conflict; seek harmony, compatibility	2	57
Strong personal opinions and positions	5	27
Self-aware of status and position regarding others	5	19

5.3. SOCIAL FACTORS

Organizational involvement and cooperation	1	84
Gregarious involvement and interaction with others	1	83
Philosophical interest in life, meaning, destiny	1	83
Benevolent concern and service for others	1	77
Communicative: oral, persuasive or literary	1	75

5.4. PERFORMANCE FACTORS

Adaptability: ability to fit in; tolerance	1	83
New problem solving: theory, hypothesis, options	1	82
Flexibility in decisions, actions, strategy	1	82
Concentration: topic, detail or procedure	2	66
Scholastic, literary search for information	2	62
Learning through study, analysis, instruction	2	57
Understanding the basic nature of things	3	52
Logical, sequential, systematic procedure	3	52
Detail: perception, retention, recall of detail	3	50
Learning by experience; craft apprenticeship	3	47
Known problem solving; familiar, repetitious	4	31
Routine: preference for familiar procedures	5	26
Permanence in steady, familiar activities	5	26

5.5. MECHANICAL ORIENTATION

Skill (quality): engineering, precision, abilities	3	46
Operational performance with machines	5	28
Feel: sensory/physical ability regarding machines	5	27
Awareness: natural understanding of mechanics	5	26
Steady (quantity): concentration, skill, routine	5	24

5.6. MECHANICAL REPAIR

New: mechanical savvy applied to all machines	3	49
Methodical: logical, sequential repair procedures	3	44
Natural awareness of machines and parts	4	39
Familiar: repair skill from previous experience	4	30
Safe, clean care of job, tools, worksite	5	18

5.7. MECHANICAL MAINTENANCE

Thoroughness and accuracy in machine maintenance	5	25
Maintenance under adverse physical conditions	5	21
Provide consistent machine/equipment maintenance	5	21
Ability to maintain and service machines	5	20
Importance of appearance in machine maintenance	5	19

6. EDUCATIONAL ANALYSIS

David E. Barbee, Ph.D., Educational Technology, must be given credit for the inspiration, ideas, and specifics in the Educational Analysis section of MAPP. Dr. Barbee designed a complete educational system based on the "the motivational characteristics and learning styles" of each student. His educational system design has much in common with the MAPP system. This becomes evident when the root meaning of education is considered: "Education: To draw out the natural powers." The Educational Analysis section of MAPP identifies the natural powers (i.e. "motivational characteristics and learning styles") of an individual. Schools and teachers can actually know the individual and his/her learning preferences before the teaching begins and be able to design the educational paths which fit each student.

LEARNING STYLES

6.1. MENTAL ORIENTATION (How you think)

Philosophical: conceptual, strategic; deal w/ideas	1	83
Intuitive/Impulsive: subconscious awareness/action	1	74
Symbolic/dramatic: visualize/project roles, images	1	73
Computational: systematic use of tangible numbers	3	55
Scientific: methodical exploration and discovery	3	53
Pragmatic/Factual: work with known facts, problems	4	30
Clerical/Logical: work with known routine and detail	5	28
Mechanical/Functional: natural mechanical expertise	5	26
Perceptual/Sensory: sight/sound/taste/smell/feel	5	26

6.2. PERCEPTUAL ORIENTATION (How you retain or block information)

General concept retention: primary ideas; essence	1	83
Triggered imagination; innovative use of options	1	82
Triggered fantasy; thinking apart from facts/reality	2	65
Triggered computation; numerical and statistical	3	53
Triggered logic: analytical exploration, procedure	3	53
Blockage of data; not perceptive of fact, detail	3	52
Rote retention: verbatim perception and recall regarding fact	3	50
Blockage under stress by anxiety, intimidation, etc.	5	20
Dogmatic blockage; set opinions resisting change	5	20
Resistance to change; attachment to the familiar	5	17

6.3. PERCEPTION REGARDING INPUT "MEDIA" (How you prefer to receive information)

Written essay: informal "literary" explanations	1	80
Auditory: general ideas, concepts; explanations	1	78
Auditory: technical, specialized fact and data	2	68
Visual: charts, graphs, blueprints, diagrams	2	64
Written, Technical: specialized content, language	2	61
Visual: pictures, illustrations, artistic forms	3	45
Published Data: nomenclature, numbers, detail	3	45

6.4. PREFERRED LEARNING ENVIRONMENTS

Dialog: learning by talking it over with others	1	89
Loose Structure: guidelines with individual choice	1	85
Social (small group) dialog, sharing, support	1	84
Social (large group) involvement, interaction	1	83
Nonstructured: self-discipline, options, choices	1	80
Absorb information from lectures (oral delivery)	1	79
Nonsocial isolation best for study and output	2	69
Individual study; isolation eliminates distraction	2	68
Formal Structure: set study conditions, times, rules	4	35

6.5. PREFERRED CLASSROOM ENVIRONMENTS

Benefit from harmonious class environment	1	93
Benefit from friendly/involved class environment	1	91
Benefit from friendly/distant class environment	1	86
Benefit from benevolent teaching and/or counseling	1	85
Copes well in tolerant classroom environment	1	84
Cope with impersonal expectations, nonpressured	1	79
Cope with critical, pressured environment	1	75
Cope with authoritarian, dictatorial teaching	1	73

6.6. SKILLS FOR TESTING PROCEDURES (How you most effectively test)

Written Essay: literary ability to present ideas	1	85
Oral/Private: ability to orally explain, discuss	1	85
Informal Appraisal: ability with general knowledge	1	84
Written-Topical: technical presentation of topic	1	80
Oral/Public: drive/ability to influence large audience	1	80
Tests Graded: rote response and accuracy for test	2	69
Multiple Choice: select best among limited choice	2	67
Tests Timed: concentrate, respond under pressure	4	41
